### Instructions to Examiners:

1. The correct use of appropriate checklists must be applied at all times.
2. A high level of RT must be exhibited at all times.
3. The candidate must be assessed as competent in the ground evaluation section prior to the practical skills test or competency check being carried out.
4. It is recommended that the ground evaluation be conducted according to the DCA recommended format (available on the DCA website).
5. All flight manoeuvres must be conducted in compliance with the POH and certification of the aircraft used for the skills test or the competency check.
6. Aspects tagged with √ are mandatory for the initial skills test and the revalidation check unless otherwise instructed.
7. If a mandatory aspect is omitted, the Examiner must write “NOT ASSESSED” and motivate the decision in the observations sheet.
8. 4-point scale

When applying the 4-point scale, award the mark that best describes the weakest element(s) applicable to the candidate’s performance.

#### 4. Excellent standard

Performance remains well within the qualification standards and flight management skills are excellent.
- Aircraft handling is smooth and precise.
- Technical skills and knowledge exceed the required level of competency.
- Behaviour indicates continuous and highly accurate situational awareness.
- Flight management skills are excellent.
- Safety of flight is assured. Risk is well managed.

#### 3. Meets DCA expected standards

Minor deviations occur from the qualification standards and performance remains within prescribed limits.
- Performance meets the recognised standard yet may include deviations that do not detract from the overall performance.
- Aircraft handling is positive and within specified limits.
- Technical skills and knowledge meet the required level of competency.
- Behaviour indicates that situational awareness is maintained.
- Flight management skills are effective.
- Safety of flight is maintained. Risk is acceptably managed.

#### 2. Below DCA expected standards

Occasionally, major deviations from the qualification standards occur, which may include momentary excursions beyond prescribed limits.
limits but these are recognized and corrected in a timely manner.
- Performance includes deviations that detract from the overall performance, but are recognized and corrected within an acceptable time frame.
- Aircraft handling is performed with limited proficiency and/or includes momentary deviations from specified limits.
- Technical skills and knowledge reveal limited technical proficiency and/or depth of knowledge.
- Behaviour indicates lapses in situational awareness that are identified and corrected.
- Flight management skills are effective but slightly below standard.
- Safety of flight is not compromised. Risk is poorly managed.

1. Not yet competent
Unacceptable deviations from the qualification standards occur, which may include excursions beyond prescribed limits that are not recognized or corrected in a timely manner.
- Performance includes deviations that adversely affect the overall performance, are repeated, have excessive amplitude, or for which recognition and correction are excessively slow or nonexistent, or the aim of the task was not achieved.
- Aircraft handling is rough or includes uncorrected or excessive deviations from specified limits.
- Technical skills and knowledge reveal unacceptable levels of technical proficiency and/or depth of knowledge.
- Behaviour indicates lapses in situational awareness that are not identified or corrected.
- Flight management skills are ineffective.
- Safety of flight is compromised. Risk is unacceptably managed.

9. Should the candidate achieve a 2 in any aspect, he or she must be re-assessed in that ASPECT and the Examiner must indicate a new grading (1, 3 or 4).

10. This form becomes invalid if an aspect graded with a 2 is not re-assessed and re-graded.

11. Should the candidate achieve a 1 in fewer than 5 aspects, he or she must undergo further training in compliance with Regulation 61.01.5 (9)(a)(b) and (c) and must be re-assessed in those aspects using the same form.

12. Should the candidate achieve a 1 in 5 or more aspects, the entire test or check must be repeated using a new form.

13. The Examiner must write comments in the observation sheet whenever an aspect is marked as 1.

14. During a competency check, in the case of a grading of 2, the Examiner may teach in a particular aspect and then immediately re-assess such aspect.

15. Should the candidate achieve a 1 in fewer than 5 aspects in an initial skills test, this form must remain in the possession of the ATO until a re-assessment is conducted.

16. Should the candidate achieve a 1 in fewer than 5 aspects in a competency check, this form must remain in the possession of the Examiner until a re-assessment is conducted.

17. Should the candidate achieve a 1 in 5 or more aspects, the Examiner must send this form to the DCA licensing section.

18. Should any aspect in section 14 (Airmanship) be assessed as “not yet competent” (NYC), the entire test or check must be repeated.
